

## 12th European Decision Sciences Conference

<https://edsi-conference.com>

### Decision Sciences in a Disrupted World

Connectivity both physical and virtual on a global scale has been a key defining theme of the 21st century. However, recent events, most notably COVID-19 have begun to test these norms. The parameters upon which societies, companies, institutions and governments rely upon for decision making have been truly tested and many assumptions and rules of engagement rewritten. EDSI 2022 aims at investigating the role, impact and positioning of decision sciences in this increasingly disrupted world, including a reassessment of the underpinning theories and practice, to provide guidance to researchers, managers and policy makers in the years ahead.
